## PROJECTS

### Speed Logistics

This project is online marketplace which provides platform for customer to connect with many transporters within a click. The main objective of our system is to save customers time as well as money.

Technologies used for frontend:-Reactjs  
Backend:-Spring Boot  
Database:-MYSQL.

### Speed Control and accident prevention System

We made a provision in a car that indicates and control over speed automatically with the help of sensors.

My roll in this project was Designed the prototype.
