

PADMANABAN GOKULA

Hi,

I am Padmanaban (**Padhu**) Gokula, a highly proficient **Javascript/Product** developer with over 12 years' successful customer project delivery experience. A frontend developer who thinks and focuses on web performance, user productivity at product designing and implementations. Currently based in Pondicherry, India, I am looking to further my career through again working as part of an enthusiastic and creative team.

I am self-motivated, always striving to learn new technologies and am expert in languages and frameworks including Angular, React, Ruby, Rails, Python, Node. Through such a broad programming knowledge, I'm able to provide optimized solutions to overcome diverse technical and business challenges.

My career has progressed from freelancing to working 2 years in the UK, which has allowed me to take lead roles within dynamic, international teams. I thrive in a multicultural team and can adjust to any given business and customer situation. With my positive mindset and friendly nature, I encourage colleagues and help build strong teams.

As a Software Development Engineer, in West Agile Labs, a San Francisco HQ'd company with a software development team in Hyderabad, India, I have owned the frontend development of 3 core projects, always working closely with clients to find feasible solutions to challenging technical environments. I regularly manage AWS infrastructures, giving me in-depth insights to scaling large enterprise applications.

My role at **West Agile Labs** has extended significantly beyond that of a Software Engineer. I have become a trusted member on the recruiting panel, and have been instrumental in recruiting many junior and senior developers. This has helped me to improve my skills' assessment knowledge and people management skills.

At **Spartez(Atlassian** development partner) in Gdansk, Poland I mainly worked on the frontend side of jira - project management tool, which helped me to extend my knowledge on scalability, usability and user experience. At **LSI Software**, where I managed two hotel management applications built in react & node.js. Lastly I worked in **Aloola.io** as Senior Software Engineer and managed an engineering team to develop an analytical auditing and monitoring software in javascript stack.

I am always willing to learn new technologies, languages and processes needed to meet and exceed clients' expectations. My commitment to always successfully complete tasks and projects no matter how challenging, is something I'm very proud of.

With the thirst for **solving real world problems**, I have several conceptual **product** ideas which can solve several problems and I'm always happy and satisfied when I find a **solution** for the problem we humans face. Hence, I decided to further progress my career in **product development engineering**, not just as a programmer.

My resume is attached. I hope this will help you to understand my working experiences to evaluate and provide an interview to showcase my skills and personality.

Thank you,
Best Regards,
Padhu G

PADMANABAN GOKULA

Chandra Shekhar Rameneni

Project Manager | Product
Owner | Occasional UX guy
August 20, 2018, Chandra
Shekhar managed Padhu directly

Complex problem solver and great coach are the phrases that come to my mind when I think about Padhu. I have had the opportunity to work with Padhu on a few critical projects. Apart from providing and completing the tasks on time, he also suggested several best practices that were thoroughly appreciated by the clients. Not to mention, he made our fun events highly memorable. I would highly recommend this guy to any team.

Venugopal Reddy Devarapally

Senior Software Engineer at
West Agile Labs
August 16, 2018, Padhu worked
with Venugopal in the same
group

I had the pleasure of working with Padhu for about over a year at Wst Agile Labs. He is a very jovial person and best at making people smile around him. He's technically sound and had given Angular Learning sessions at West agile Labs. I had the privilege to attend the session and had learned Angular 4. He explains the topics in an easy manner and makes the learning process enjoyable. Any team would be lucky to have him.

Del Jones

Certified GDPR Practitioner
and LinkedIn Campaign
Specialist. Inspiring your
successful social selling
campaigns.
