This internship covered basics of HTML5, CSS3, Bootstrap, .Net framework, Asp.net web forms CRUD operations, Creation of Database in Database in MsSQL, ADO.NET.

BrainyBeam Technologies Pvt. Ltd., Internship

Ahmedabad, India

Python with Data Science

This internship covered Data cleaning, Removal of duplicate data, Product Recommendation, Product rating, Decision tree, Introduction of NLP, NLU, NLG, Random module function, Filtering, gTTs etc.

Projects

nopCommerce (Plugins & Themes) [↗](#)

nopCommerce is an e-commerce platform. A ready-to-use solution for e-Commerce. It provided multilanguage and multistore support with customer inventory and vendor management systems. My major role in this project was to develop the team and convert the ideas into plugins & themes and deploying them on the marketplace and managing them with the latest nopCommerce version.

I also handled the client task with team which include the upgradation of the nopCommerce version and successfully deploying the .Net project on the Ubuntu server with the MsSQL database.

Fargetta [↗](#)

Fargetta is a multi-brand store specializing in the sale of clothing and accessories for men and women. It offers its customers a wide selection of items from the best fashion brands. I have migrated the database and upgrade the application using .Net core with C#.

Throughout the development process, I was responsible for upgrading the application, implementing various customization features to enhance the functionality that comes up with customizable themes and plugins, social media integration, multiple payment options, Intuitive navigation, blog posts and many more.

Tech Stack: Tech Stack: C#, LINQ, .Net Core, MSSQL, jQuery

MgActiveWear [↗](#)

MG Activewear is an online sportswear store that offers a range of niche fitness brands from around the world. With a focus on quality and performance, it is focused on providing a unique shopping experience for customers who are looking for niche fitness brands from around the world.

My technical contributions included, implementing various customization features to enhance the functionality of MG Activewear. Additionally, migrate the database, upgraded the web application and integrated themes & plugins.

Configured payment, shipping and tax methods.

Tech Stack: C#, LINQ, .Net Core, MSSQL

Project Title: DogProducts [↗](#)

This is the eCommerce web application based on nopCommerce. Application has Website for Customer, Admin, Vendors and Guests. It provides functionality to buy Dog products such as food, clothes, beds, walk essential and many more.

Front-End : Microsoft Visual Studio 2022 (.NET Framework 7.0)

Back-End: Microsoft SQL Server 2013

Role: Designing, Developing new requirements as and maintenance of existing developed modules.

Project Title : SkyCars

SkyCars is the first self-drive rental car service in all cities, where you can get cars, and drive yourself by renting. It's a solution for those who want to rent a car, but don't want to spend a fortune on it. You can choose from our wide range of cars, and drive yourself for rent based on your affordability and customs choices. With SkyCars, you can have the best of both worlds: the convenience of driving yourself, and the experience of renting a car.

Front-End : Microsoft Visual Studio 2022 (.NET Framework 6.0) (.Net Core MVC)

Back-End: Microsoft SQL Server 2018 & Microsoft SQL Server 2019

Project Title: EquipRental, (Internship project)

I made the Web Application of renting appliances using the Visual Studio and .Net Tech stacks, where any person can login and rent Home appliances, Furniture, Electronics etc. I made ER Diagrams from analysis and reduced redundancies. Finally wrote some queries and functions on the database.

Front-End : - Html5, Css3, JS, Microsoft Visual Studio 2010 (.NET Framework)

Back-End: - C#, Microsoft SQL Server
