  - Support programmers and analysts to conceptualize and develop new software programs.
  - Plan software development lifecycle phases.
  - Prepare and document software specifications and requirements.
  - Research and document software users' requirements.

Projects Undertaken

- **Project Name**: Automatic Answer Checker (ASP.NET/C#)
- **Details**: An automatic answer checker application that checks and marks written answers similar to a human being. This software application is built to check subjective answers in an online examination and allocate marks to the user after verifying the answer. The system requires you to store the original answer for the system. This facility is provided to the admin. The admin may insert questions and respective subjective answers in the system. These answers are stored as notepad files.
- **Technology stack**: ASP Dot Net API, MS SQL Server, MVC
- **Role:** Developer
- **Responsibilities:**
  - Take part in the CR Meeting.
  - Manage Azure DevOps Server
  - Designing, Coding, Creating Database object

- **Project Name**: Salon Management System (ASP.NET/C#)
- **Details**: A system for managing a hair salon. This system keeps track of employee salaries, inventory and customer data along with billing. This is a fully equipped system that alone manages the entire functioning of a hair salon. It maintains stock of inventory coming in. It also manages individual employee salary. The system is even equipped to manage customer billing and data storage.
- **Technology stack**: ASP Dot Net API, MS SQL Server, MVC
- **Role:** Developer
- **Responsibilities:**
  - Take part in the CR Meeting.
  - Manage Azure DevOps Server
  - Designing, Coding, Creating Database object

- **Project Name**: Invoice Billing System Software (ASP.NET/C#)
- **Details**: This system includes billing of every detail on daily, monthly and usage basis and store the records into the database and aggregating these records periodically to calculate invoice and sending invoices to the users on monthly basis and collect payments from every user and update details into the database.
- **Technology stack**: ASP Dot Net API, MS SQL Server, MVC
- **Role:** Developer
- **Responsibilities:**
  - Take part in the CR Meeting.
  - Manage Azure DevOps Server
  - Designing, Coding, Creating Database object

- **Project Name**: Meeting in a Minute (ASP.NET/C#)
- **Details**: Meeting minutes are the written or recorded documentation that is used to inform attendees and non-attendees about what was discussed and what happened during a meeting. The meeting minutes are generally taken or recorded during the meeting so that participants have a record of what happened during the meeting. Meeting minutes provide an important record of proceedings, whether it's for a corporate staff meeting, a board meeting at a nonprofit organization, or an informal committee meeting.
- **Technology stack**: ASP Dot Net API, MS SQL Server, MVC
- **Role:** Developer
- **Responsibilities:**
  - Take part in the CR Meeting.
  - Manage Azure DevOps Server
  - Designing, Coding, Creating Database object

Qualification

- **B.E (Computer Engineering)** from Hansaba Collegeof Engineering and Technology, Sidhpur to GTU in 2018 with 8.27 CGPA.
- **Diploma (Computer Engineering)** from Kilachand Devchand Polytechnic, Patan to GTU in 2015 with 7.75 CGPA.
- **S.S.C** from G.S.E.B in 2012 with 76%
